Software Freedom For All

Linux Professional Institute Training Course

“Linux Training of Trainers, Malaysia”

Introduction.

A major barrier against adoption and deployment of Open Source Software is the lack of human resources with open source software skills. This introductory programme aims to address the problem by training trainers so that these trainers in turn will be able to train other trainers and therefore a kick start for self sustaining of open source human capacity building.

OUM Open Source Community in collaboration with Dreamsoft (M) Sdn Bhd and UNDP will be organising two weeks workshops on LPI in Kuala Lumpur, Malaysia from July, 9th – 20th, 2007.

This ten-days workshop provides the knowledge and skills for Linux system administrator. The workshop covers the 101 and 102 syllabus.

Information for participants

- >> Lab times
9:00am - 5:00pm (open until 6:00pm for revision/exercises)
- >> Course Dates
9th July - 20th, July (Full day)
- >> Location
